

PROSKIRTING ISP

DESCRIPTION

PROSKIRTING ISP is an aluminium skirting board profile properly designed to allow the installation of low-voltage electric cables like web, computer, telephone and satellite TV cables. After laying, it looks a normal skirting board with a modern and elegant design.

MATERIAL

PROSKIRTING ISP is a skirting board profile available in heights of 70 and 100 mm. It is composed of punched supports in natural aluminum (1) with a width of 20 mm and of a visible profile (2 - 3). The supports must be fixed to the wall with screws every 50 centimeters. The visible profile, that have to be fasten to the supports, is available in silver anodized aluminum, polished titanium aluminum and brushed titanium aluminum. The profile allows, thanks to the inside channels, the installation of low-voltage electric cables like web, computer, telephone and satellite TV that will always be easily accessible.

PROSKIRTING ISP, after laying, thanks to the availability of special pieces such as internal corners, external corners, junctions and end caps is a much sought after and easy to lay skirting board.

AREAS OF USE

PROSKIRTING ISP in aluminium is suitable for every indoors environment.

WARNINGS

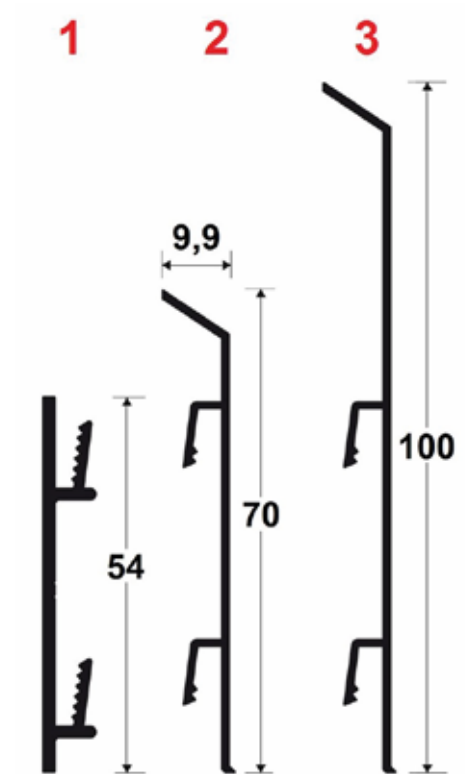

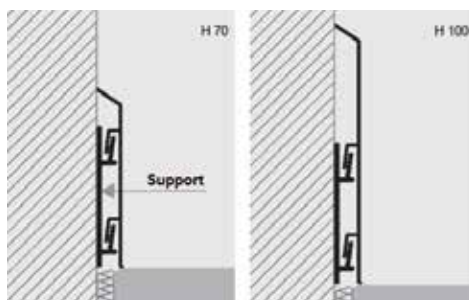

Do not use **PROSKIRTING ISP** in aluminium outdoors and in environments where aggressive substances are present.

MAINTENANCE

PROSKIRTING ISP does not require any special maintenance; it is suggested to clean it with normal household cleaning products.

LAYING INSTRUCTIONS

1. Choose "**PROSKIRTING ISP**" in the desired finish and height.
2. Fix the punched support to the wall with screws every 50 cm.
3. If expected, laying the low-voltage electric cables like web, computer, telephone and satellite TV.
4. Attach the profile to the support applying low pressure.

TEXT TEMPLATE FOR TENDERS

Delivery and installation of skirting board profile in the height of 70 / 100 mm. It is composed of punched supports in natural aluminum with a width of 20 mm and of a visible profile. The supports must be fixed to the wall with screws every 50 centimeters. The visible profile, that have to be fasten to the supports, is available in silver anodized aluminum, polished titanium aluminum and brushed titanium aluminum. The profile allows, thanks to the inside channels, the installation of low-voltage electric cables like web, computer, telephone and satellite TV that will always be easily accessible, like PROSKIRTING ISP of the Progress Profiles company.
