

Progress Profiles combines the skirting to any parquet

Battiscopa PVC is one of the new Progress Profiles products for floating floors in laminate wood. Made of PVC foam, with height of 70mm and depth of 16mm, the Battiscopa PVC can be combined with almost 30 different shades of wood. The laying of the skirting board can be performed with gluing (acetic silicone-acrylic-mastic) or with a simple structure fixed with screws, bolts or nails.

The new Battiscopa PVC is strong, durable and cheap, easy to lay and suitable for any environment, both public and private.
