

PROSHOWER is a channel body in stainless steel AISI 304/1.4301 – V2A steel for the realisation of floor-level shower. The body channel, with an overall height of 85 mm, is completed by 6 different grids in stainless steel. **PROSHOWER** undergoes electro-polishing and subsequent passivation, which guarantees excellent resistance in any environment. Its low thickness combined with the fully adjustable siphon, the modularity and the high number of grids make it a much sought-after solution.
