

PROLISTEL LED

DESCRIPTION

PROLISTEL LED is an aluminum decorative listel provided with an integrated LED lighting system that generates a suffused light. Its particular design and the ease of installation make it a much sought after profile inasmuch decorates every kind of covering.

MATERIAL

PROLISTEL LED is an anodized silver aluminum and polished chrome aluminum decorative listel, with a width of 20 mm and height of 8 mm. It is equipped with an integrated LED lighting system that can generate a cold, hot and neutral suffused light. Its aluminum structure is provided with dovetail cavities that guarantee the anchorage of the adhesive and with a special fixing system that allows to remove the matt or transparent polycarbonate strip. Its particular design, the two finishes available and the ease of installation make **PROLISTEL LED** a much sought after profile inasmuch decorates every kind of covering.

AREAS OF USE

PROLISTEL LED in anodized and polished aluminum is suitable to be used for indoor walls.

WARNING

Don't use **PROLISTEL LED** in anodized and polished aluminum outdoor and in areas in contact with water and aggressive substances. Clean immediately the surface of the profile from all remains of adhesive or grout after laying; the permanence of these substances on the surface may lead to formation of non-removable aluminium hydroxide (dark halos).

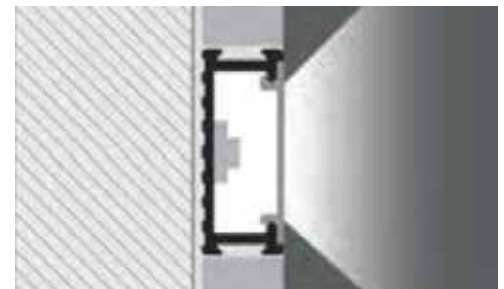

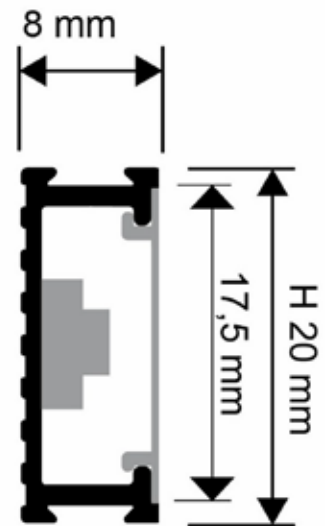

MAINTENANCE

PROLISTEL LED does not require any special maintenance. It is suggested to clean it with normal household cleaning products.

LAYING INSTRUCTIONS

1. Choose "**PROLISTEL LED**" according to the desired finish.
2. Cut "**PROLISTEL LED**" to the desired length and apply the adhesive on the surface where the profile will be laid.
3. Press "**PROLISTEL LED**" into the adhesive, aligning it with the tiles leaving a 2 mm joint. Remove immediately all remains of adhesive from the surface of the profile.
4. Fill the joints between the profile and the tiles with grout, in order to avoid water stagnation. Remove immediately all remains of grout from the surface of the profile.
5. Install the LED lights and connect it to the power supply.
6. Install the removable polycarbonate strip.
