PROTERRACE DRAIN DRIP

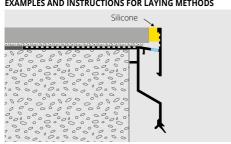

VARNISHED/COATED ALUMINIUM

PROTERRACE DRAIN DRIP is an edging profile in varnished aluminium, designed to protect the edges of the tiles on terraces and balconies and to allow the downflow of water. The profile is provided with a flange that ensures the right fixing and an adhesive stripe in open cells polyurethane, which protect the outflow holes to be closed by silicone.

PFDPP ... AL...

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose PROTERRACE DRAIN DRIP according to the tile thickness and desired colour. 2. Fix the external corners to the screed (at least 1 cm from it) with nails. 3. Fix the draining adhesive stripe in polyurethane on the vertical side of the profile. **4.** Cut the PROTERRACE DRAIN FDP at desired length joining it to the corners using the linking elements and fix it with nails to the substrate. **5.** Lay the desired waterproofing system. **6.** Lay the tiles leaving at 5. mm between the tile and the profile. **7.** Seal the space between tile and profile with PROBAND FIX.

PROTERRACE ECO DRIP

VARNISHED/COATED ALUMINIUM

PROTERRACE ECO DRIP is an edging profile in aluminium designed to protect the front of the screed from water penetration and the edges of the tiles laid on terraces and balconies. The profile is equipped with a punched flange that ensures its fixing to the support. The front the profile is equipped with a double drip to improve the push away of water from the wall.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose "PROTERRACE ECO DRIP" according to the tile thickness. Cut "PROTERRACE ECO DRIP" according to the lile thickness.
 Cut "PROTERRACE ECO DRIP" to the desired length and fix it to the support with nails.
 Apply the desired waterproofing system, sealing the joint between profile and waterproofing.
 Lay the tiles, leaving about 5 mm between tiles and profile.
 Seal the space between tiles and profile using PROBAND FIX.
