

PROEND GRIP is a non-slip step nosing profile in anodised aluminium with adhesive non-slip 20mm thick insert in black carborundum to be fitted in the relative groove in the top of the profile upon completion of laying. The profile may be laid with fixing screws hidden afterwards by the adhesive carborundum, or with silicone and/or adhesive to be applied on the bottom of the profile, which is designed to ensure an excellent grip. It is made in anodised aluminium with silver, gold or bronze finish with anodising coat of approx. 15/20 micron.

bar length 1,66 LM - pack. 20 Pcs

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the suitable profile for covering the edge of the step. 2. Clean the surface on which the profile is to be laid, ensuring that it is grease-free and dry. Do not apply the strips at temperatures below 15°. 3. Remove the protective paper from the adhesive and lay correctly by applying pressure evenly over the whole profile without using a hammer.

If the punched PROEND GRIP has been chosen, screw the profile to the step and apply the adhesive carborundum to hide the screws.

PROGRIP is a self-adhesive product in carborundum consisting of a plastic film plus abrasive granules with high resistance to wear It is normally used to guarantee safety on steps in public and private environments, as required by accident-prevention laws, Available in various colours and widths to meet all technical and aesthetic requirements. It is advisable to apply 2 strips on each step, rounding off the ends.

EXAMPLES OF LAYING

(for a precise assessment of colours and finishes, see the relative enclosed sheet)

LAYING INSTRUCTIONS

LATING INSTRUCTIONS 1. Throrough clean and degrease the surface of application, 2. Round the ends of the sirips. 3. Remove the protective paper from the adhesive and lay the PROGREP using a roller. A Do not apply the strips at temperatures below 15°, otherwise heat the strips and the step. 5. When necessary clean away imputies with a bursh and preserve the PROGREP. 6. When laying on files, cut and round the corners of the strips on the inner part of the tile. 7. Carefully seal the outer edges of the strips to prevent water infiltration
